

# Validator

Explore your idea, risk-free.

STOCKHOLM SCHOOL  
OF ENTREPRENEURSHIP

## 1 . What is the Validator?

The SSES Validator is a program providing individuals the operational and financial support to validate new ideas without incurring financial risk, creating more resilient ideas and better deal-flow into the innovation ecosystem.

## 2 . Why do we need it?

For an innovator, idea validation can take up time and resources, and is a high-risk endeavour. By eliminating the element of financial risk, the Validator awakens the potential that lays dormant in so many innovators. Awakening this potential means a better quality future for all.

## 3 . What's in it for you as a partner?

As a partner you will receive :

- steady deal-flow from secondary and tertiary networks
- the ability to connect with innovators who are relevant to you or your organisation
- the opportunity to generate revenue for your organisation
- your organisation's offering

## 4 . How can you get involved?

To best utilise the Validator as a partner, we suggest the following steps:

- identify those in your network who can provide validation services or resources
- share information about Validator to your network
- instruct interested applicants to apply, citing your validation offering as the proposed validation strategy.

For questions about the Validator  
and how to get involved:
