- Privacy governance
- The privacy office
- Privacy intelligence

## OPERATIONAL EFFICIENCIES

- Quality in privacy compliance
- Privacy awareness
- Privacy intelligence

# SCHEDULE

DAY 3  
9.00-17.00

## CASE STUDY DISCUSSION AND SHARING

Participants are invited to perform a DPIA using the Privasee's Agile 7-step DPIA model.

Using the case study method and based on a real case, participants are invited to take on the role of a consultant and conduct a DPIA on personal data in a CRM. Working in groups, participants are challenged to take the step-by-step assessment based on the limited information that is provided and the formulation of the right questions.

# INTENDED AUDIENCE

- DPO's (data protection officer)
- Compliance managers
- Project managers
- Risk managers
- Information security managers
- Auditors (ISO 27001, PCI-DSS, SOX, etc.)
- Human Resource Managers
- Marketing and Communication Officers
- Call Center Managers
- Any professional wanting to better understand how GDPR impacts their business
- Any professional wanting to understand how GDPR can be monetized as a business opportunity.

“ The CPP was an opportunity for learning how to apply the GDPR in the context of my company.

It was very well organized as it was balanced between the theoretical knowledge and practical exercises.

I recommend the CPP to all Data Protection Officer's but also for managers that are responsible for processes and, therefore, making sure that they comply with GDPR.

Patrícia Eirinha,  
Nursing Manager, Diaverum

## EDUCATOR

KAREN LAWRENCE  
ÖQVIST

Founder and CEO of Privasee, is a clear advocate of privacy as a right.

She is a Fellow in Information Privacy and author of the book "Hands-On Guide to GDPR Compliance Privacy by Design, Privacy by Default".

With two masters degrees and IAPP's privacy certifications, she has been a speaker at several conferences and developed a methodology to facilitate the understanding and integration of GDPR compliance principles in organizations.

# LEARNING OBJECTIVES

- Scoping the GDPR program
- How to use GDPR tools, e.g. Apps with GDPR (Articles and Recitals)
- The identification and management of privacy risks
- The key elements of a data protection impact assessment (DPIA)
- Build an accountability matrix, including a controller and processor roles
- Scope the personal data discovery project.

## APPROACH

- In the classroom, a hands-on methodology will be used, focused on experimentation and doing, using the case study method, practical exercises, group dynamics, stimulating discussion and sharing.
- Karen Lawrence Öqvist and Filip Johnssén's book Hands-on Guide to GDPR compliance: Privacy by Design, Privacy by Default, a publication of the International Association of Privacy Professionals (IAPP), will serve as a training manual.
- All participants will also be provided a reading-list with articles, documents and legislation to read before and during the training.
