

CERTIFICATION : EN 795 : 2012 Type B - CEN/TS 16415:2013 / REGULATION : 2016 / 425

## TECHNICAL SPECIFICATIONS

- Weight : 6,9 kg
- Material : zinc plated
- 2 anchor rings of Ø18mm inside
- Dimensions : 1425 x 160 x 100 mm

## USE

Intended to anchor a fall arrester or a restraint system.  
This device is to secure two users.  
To anchor on a door or window frame or any other opening in  
a wall strong enough to resist.  
To align on the lower part of the structure.

## DESCRIPTION

NBA060 is a transportable anchorage beam intended to create one or two anchorage points against a door or a window framework. Made in zinc-plated steel, it is a resistant and reliable system. It includes a mobile plate to be adjusted against frames going from 0,35 m to 1,24 m.
