DESCRIPTION

Range of anchor connectors manufactured to be used with a load operating in a specified direction. These connectors are made of corrosion treated steel or light aluminium base alloy. They are all fitted with automatic closing gate and automatic locking system. The opening determines the kind of components that can be connected together so as to ensure a safe locking.

USE

Works on height with vertical fall hazards : connecting elements.

TECHNICAL SPECIFICATIONS

REF.	Class	Locking	Opening	Static resistance	Material	Weight
NM18LF	T	Auto	20 mm	23 kN	Steel	255 g
NM18LFT	T	Auto	21 mm	23 kN	Steel	330 g
NM26ELFA	T	Auto	28 mm	23 kN	Aluminum	184 g
NM65GO	T	Auto	60 mm	23 kN	Aluminum	245 g
