

# HARNESSES

## ITAKA

### Work and positioning harness, extremely light and comfortable.

- Equipped with three anchor points (ventral, sternal and dorsal) and two lateral positioning rings in light alloy, which can be locked in the closed position to prevent accidental entanglement.
- Ample padding to guarantee maximum comfort; lightened waistband to increase breathability, and superior padding with ergonomic shaping.
- Removable upper part which can be completely disconnected via the small, light alloy connector.
- Predisposed for connecting the Hammock seat, thanks to two textile loops sewn frontally on the waistband.
- Two loops on the shoulder straps where the Diapason system can be connected for vertical recovery.
- The waistbelt is equipped with two large gear loops and four textile loops for directly connecting tool bags. In addition, there are two other passages for captive insertion of gear-holding connectors.
- Predisposed for mounting the chest ascenders Futura bod Clean and Cam Clean via specific webbing with rings already installed.
- Rear attachment ring is positioned high on the back to allow backpacks and/or oxygen cylinders to be carried; this ring is also oriented in order to avoid accidental entanglement in the event of recovery from a confined space.
- Equipped with NFC chip to facilitate product traceability and to speed up periodic inspections.
- Accessories included: two special textile gear holder loops that can be placed on the shoulder straps or on the belt, removable with velcro.
- Available in three sizes (S, M / L and XL).
- 150 Kg certification
- High quality, Made In Italy!
